

## Biographical Information:

### **Angus HM Ireland**

Angus is the Program Manager – Fibre Advocacy and Eco Credentials for Australian Wool Innovation Limited.

From the NSW tablelands, he studied Wool and Pastoral Science at the University of NSW and completed a Post Graduate Diploma of Business at Deakin University.

Angus has experience in raw wool specification and management of wool research and testing operations. He has contributed to the development of automated wool sampling and testing instrumentation for characteristics including, staple length, staple strength, dark fibre, colour, diameter variability and yield.

Angus' current focus is on extending the scientific basis for wool's wellness and environmental attributes. These activities involve partnering with research institutions in Australia and overseas in the conduct of specialist human wellness research, environmental research and in facilitating international advocacy activities for wool.

Prior to employment with AWI, Angus worked in a variety of research and operational roles at the Australian Wool Testing Authority Ltd.

Angus is married to Irene Ireland (1990) and together they have two daughters, Kate (23) and Sarah (17) and two sons David (21) and Lachlan (20). He is closely involved with operation of the family property at Mudgee, NSW.
